	Maximum user weight	90 kg

- 1 Frame
- 2 Seating
- 3 Rear wheel with handrim
- 4 Footrest
- 5 Front wheel
- 6 Fork
- 7 Shock absorber
- 8 Holding brake

## Carbon shell

The handles can be used by the accompanying person, for example when going up or down steps.

Provides real comfort thanks to the firm shell support.

5 backrest height possible  
From 30 to 50 cm.

## Options

Several wheel models available.

Frame available in several colors.

## Frame adjustments

Variable seating angle from 0° to 20°

The backrest angle can be increased or decreased to suit your requirements, using ratchet buckles.

Easily and quickly adjustable without tools, while sitting in the wheelchair. Enables the ideal position to be found, indoors or outdoors.

## Rear wheel camber

Two possible positions :

- Narrow position (1.5°) : for everyday use, indoors to reduce width, or outdoors in the absence of major obstacles.
- Wide position (7°) : used for outings or in sports contexts, it enhances lateral stability and reduces the risk of backward tipping.

## 3 handlebar models

And further options...

## Several pushrim models.

Wheels and spokes available in several colors.
