HIPPOLIB

The Hippolib is an **educational saddle module** that facilitates access to horse riding for people with disabilities.

After 6 years' research and several prototypes, the G2M group put the finishing touches to the **Hippolib module** and put it on sale for the general public.

Patented in 2012, the Hippolib® – an innovation on a worldwide scale – meets the requirements of **adaptability, comfort, safety and performance**.

In 2012, Hippolib received the Trophée de l'Innovation, an award given every year for the **best innovation** at the service of horses and horse-riding activities, along with the Trophée Coup de Cœur at the Paris Horse Show.

COMPOSITION

Equipped with a forwards and backwards adjustment system and two types of backrest

- **V-TRAK adjustable backrest** that provides personalized support.

- **Pelvic brace** for pathologies that require only minor support.

the Hippolib is adjustable in depth and height, ensuring good support for the rider. There is also a safety setting that allows the rider to release themselves easily.

Hippodrive

Hippogel

EQUIPMENT AND OPTIONS

The Hippolib is supplied with a **shock absorber pad** and a **saddle blanket**.

- **L'Hippodrive** : Teaching reins used to quickly adjust hand positions on the reins.

- **L'Hippogel** : Gel cushion relieves friction on the saddle to prevent the risk of pressure sores.

THE ADJUSTABLE BACKREST

The V-TRAK backrest **can be adapted to suit different morphologies** and will ensure that the rider is optimally positioned and firmly held.

Equipped with ergonomic padding and adjustable back tension for **unrivalled comfort**.

It is combined with an adjustable multi-position arm so that depth, height and angle will be quickly and efficiently corrected with **ease**.

Pelvic brace

The V-TRAK folder is available in both adult and child versions.

This saddle module is the result of various studies and research and development in partnership with:

Centre d'Analyse d'Images et Performance Sportive

CREPS DE POITIERS

CENTRE DE RESSOURCES D'EXPERTISE ET DE PERFORMANCE SPORTIVE

ECOLE NATIONALE d'EQUITATION
Le Cadre Noir - Saumur

Institut français du cheval et de l'équitation

Institut français du cheval et de l'équitation

The research works were carried out jointly by ENE (National Riding School in Saumur) and CAIPS (Centre for the Analysis of Sports Images and Performance), and funded by the Ministry of Sports. The Cadre Noir's riding master, Jean-Frank Girard and the adaptive sports rider Céline Gerny took part in the working group and tested the different prototypes during the design phase.
